ABSTRACT OF THE DISCLOSURE

A floor cleaning solution filtering system includes a mop bucket defining a cleaning solution basin. A pump is exteriorly mounted on the bucket and is in fluid communication with the cleaning solution basin. A filter system is exteriorly mounted on the bucket, in fluid communication with the cleaning solution basin, and operationally connected to the pump. The pump draws fluid from the cleaning solution basin through the filter system for return to the basin after the cleaning solution has been filtered. The bucket may include a single basin or a dual basin.
